ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.*

(54) Title: RESIN COMPOSITION AND MULTI-LAYER ARTICLE THEREOF

(57) Abstract: The present invention relates to a resin composition superior in antistatic properties, processability and compatibility comprising 5 to 50 parts by weight of a potassium ionomer (A) of an ethylene-unsaturated carboxylic acid copolymer, 0.5 to 20 parts by weight of an ethylene-unsaturated ester copolymer (B) and 94.5 to 30 parts by weight of another thermoplastic resin (C) such as highly crystalline polyolefin type resin, and a single layer article or a multi-layer article having at least one layer of the resin composition. The resin composition and the multi-layer article are especially useful for a packaging material such as film, sheet and container.
